

Masters of chemical
paint stripping

Who we are

Specialists in the chemical stripping of metallic surfaces and preferred partners of countless industries around the world, ALIT Technologies has proven itself as a master by offering innovative chemical paint stripping systems as well as high performance paint stripping products with low environmental impact.

Why Alit Technologies?

The widest products range

We offer a wide range of products and technologies for aluminium, steel, iron, zinc, and light alloys. We also provide solutions for different metallic substrates as well as several kind of paint including powder coatings, liquid paints and e-coatings.

Flexibility and vision

ALIT Technologies is a dynamic and customer-oriented reality, focused on researching and developing innovative processes. We aim to venture "out of the box", breaking the rules to find alternative solutions.

Always beside you

We are able to make the difference into the market through our hallmarks: we always work in close co-operation with our partners, building with each of them a relationship of mutual trust, which translates into quick and concrete answers.

FASTRIP

The Fastrip line-up of machines by ALIT Technologies is an industrial concept that offers endless possibilities for customization. They can be perfectly intergrated into existing production lines or become a stand-alone service for those who recognize in the professional paint stripping service, a future business.

METALSTRIP

Metalstrip is the line of innovative chemicals developed by ALIT Technologies, featuring high performances and low environmental impact. Metalstrip chemicals are the result of our constant research and valuable collaboration with our industrial partners, in order to enhance the paint stripping process of hooks, frames, racks and metal workpieces of different shapes and sizes (including aluminum profiles up to 7 meters).

Values and targets

Chemicals

We develop efficient and low-environmental impact chemicals for the recycling of metal products in order to reduce waste.

Technologies

Our continuous research aims to offer concrete solutions, plant engineering and machines to enhance your production process.

Innovation

Every product is the result of years of experience in the market, which led us to develop innovative processes, combining our chemical and plant engineering know-how.

Social responsibility

We promote a pleasant, young, and stimulating environment for our employees, where they have the opportunity to grow up personally and professionally. From our headquarters in the Northeast of Italy, in the province of Verona, we are glad to present a long-awaited answer for automotive, metalworking, and painting companies: they can now quickly and effectively restore badly painted products by using our cost-saving solutions.

Numbers

600
thousands

stripped hooks by day, without production stops.

up to
5%

kilos of paint saved every year by our clients.

60
systems

settled worldwide.

16
hours

average of fewer workforce hours, every day per each system.

“Our aim is researching and testing innovative and sustainable solutions for industrial paint stripping, improving the productive performances of our clients”

Loris Rossi, CEO ALIT Technologies

Where you can find us

Our factory is located in Verona, North-East Italy:
Via Cavalieri d'Italia,7 - 37047 San Bonifacio (VR).
